patchVantage

Automates and Simplifies Key Oracle DBA Tasks to Dramatically Reduce Costs and Improve Security

Features

patch**Vantage**
Advanced System Administration

Patch Automation

"Critical Patch Sets(CPU) are released every 3 months in addition to regular technology and functional enhancements , meaning there's a constant need to update . Can handle complex RDBMS & EBS Upgrades"

CPU and Upgrades instructions can be rapidly uploaded and applied

Clone Automation

"Cloning allows changes to be developed and tested safely, but requires specialist DBA skills and can be very time - consuming"

Migrate whole Oracle stack between on premise and Cloud

Managing User Access

"Provides end-users with URLs to each environment along with the status of core components like the database, web server and job schedulers "

End Users quickly see what patch sets have been applied or are missing

Compliance & Securing Data

"Tracks every action, provides useful and easy to read Log Files whilst prohibiting access to passwords and other features, based on the DBA role "

Cloud SaaS tracks location of DBA

Snap Clone

"Users can now create clones(copies) of a database or application in seconds using self-service web. In addition to time it saves huge amounts of disk space"
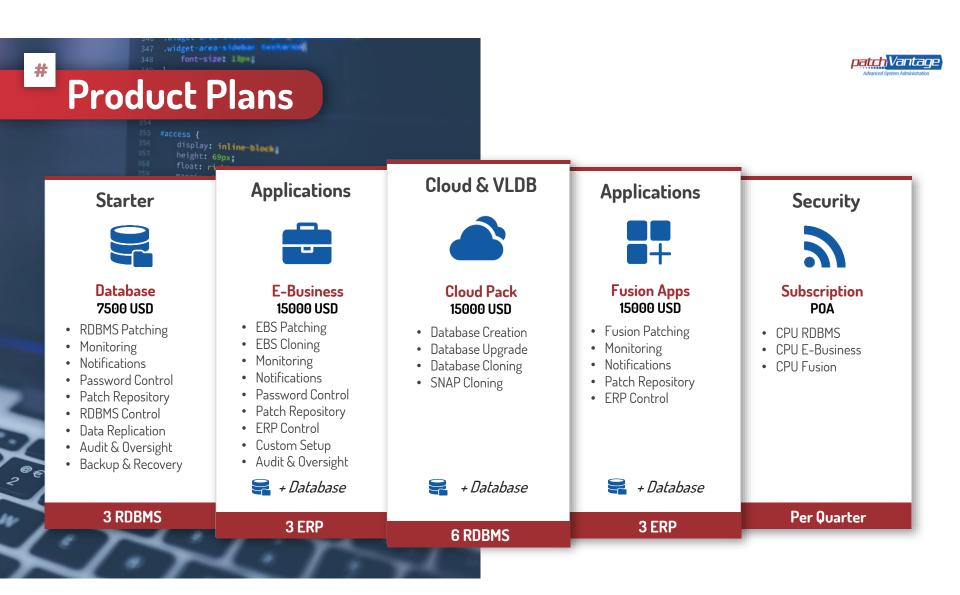

Clone 100TB databases in minutes
